IN PARTNERSHIP WITH

Amplifi and Precisely bring together a combined approach to driving better business through better data. By pairing superior technology with Amplifi's data consultancy services, we are able to harmoniously enhance data solutions to meet the needs of our customers.

Amplifi is a specialist consultancy providing Advisory, Delivery and Support services for data management, data governance and data quality.

We are driven by business outcome and long-term success for our clients. We are not just another system integrator but a strategic partner invested in delivering solutions that align to your business objectives.

Precisely's process automation and data management solutions empower businesses to get real value from their data.

Precisely Automate helps improve data quality and streamline master data processes across your SAP landscape - not just materials, customers, vendors, and finance - with automated solutions that eliminate manual data entry.

"Amplifi have the experience of implementing Precisely's process automation and master data management products. These products coupled with Amplifi's expertise delivers true value to our customers and ensures their data management practices are streamlined and future-proofed."

Justin Thomas, Sales Director at Precisely

Faster processes, better data

With Precisely Automate Evolve, you can streamline your existing SAP business processes, improve data quality and meet your compliance goals all in one place. No matter what stage of the journey you are on, our strategic partnership can help you create real impact.

Amplifi and Precisely have already helped many businesses tackle some of their SAP automation and integration challenges.

Automate any SAP process

From speeding up product launches to closing the books faster, use Automate Evolve to automate any master or transactional data process, and improve data quality.

Bring your data governance policies to life

Improve data quality and compliance with repeatable workflows and an extensive range of data stewardship capabilities.

Use Web forms or Excel

Choose the front end that makes sense for your process—intuitive role-based forms to handle one or a few related records, or Excel workbook to handle hundreds or thousands of records at a time.

Built for SAP

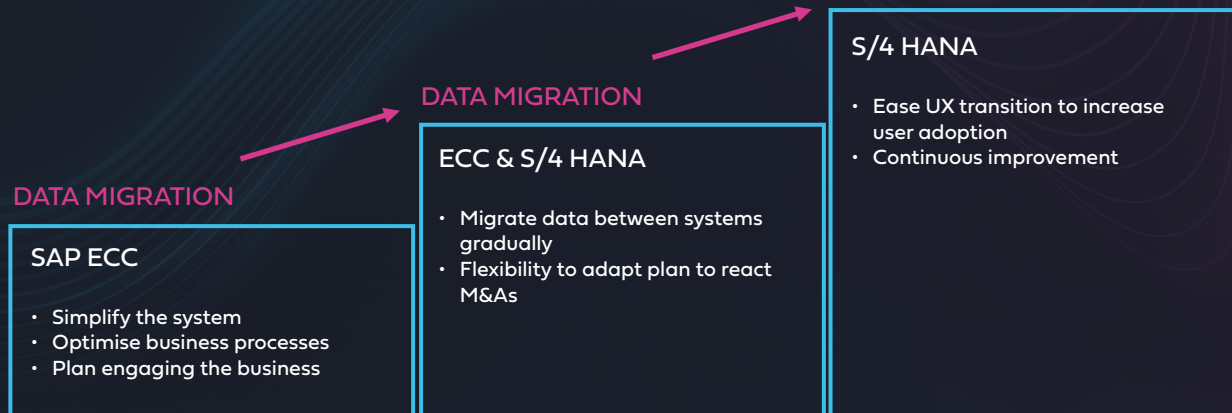

Deploy faster and get better business results by using a forms and workflow solution with deep SAP integration capabilities built-in.

Transition to SAP S/4HANA

All organisations currently running on SAP ERP will need to update their system from ECC to S/4HANA over the next few years.

Precisely and Amplifi can help streamline your journey to the new platform and help you work smarter once you get there. This will be a gradual process, but our process automation and data management solution expertise is second to none, so we can guide you every step of the way.

SAP® S/4HANA Journey

precisely

A PLATFORM TO MANAGE AND GOVERN DATA

3-4 years

Be proactive, and get your data right the first time, every time

Good data underpins the success of any data management initiative. What you put in will always affect the results you get out. We have outlined just a few of Precisely Automate's data stewardship capabilities below:

Reduce duplicates with built-in checks

Precisely web forms support numerical, text, and wildcard searches, making it simple to find existing records and avoid creating duplicates.

Add control with role-based views

Configure web forms or Excel workbooks with fields that are relevant to someone's role. Choose which fields business people can edit or just view.

Make choosing the right value easier with drop-down lists

Narrow down the available field options by defining preset values with drop-down lists and give users access to SAP F4 lookups from forms or Excel workbooks.

Use logic to drive better data quality

Drive workflow steps and fields presented based on user input by building solutions with smart logic.

Save time and improve quality with "copy from" functionality

Populate data from existing records into web forms or Excel workbooks, then make necessary edits.

Check data before posting with live SAP validation

Enable users to validate data before posting. Precisely software presents any errors in language that's easy to understand, enabling users to quickly fix issues.

Make fields required - without the hassle

Instantly make fields required in your web forms and eliminate holes in your data without going through the pain of making those fields required in SAP.

Improve data accuracy with third-party web services

Integrate third-party web services like address validation tools into your web forms to improve data quality.

All of your data in a single, governed source

Managing your master data effectively means improving the consistency and quality of the data that is critical to your business.

Precisely Automate's technology can help leverage a central repository of reliable, up-to-date master data consolidated across all enterprise applications with powerful tools to improve data quality and governance. Amplifi has a team of MDM experts who can provide the advice, implementation skills and on-going support and enhancement you need to make your initiative a long term success.

Create a "golden record" for data entities by integrating databases and systems.

Extract, load, publish and syndicate content accurately and consistently.

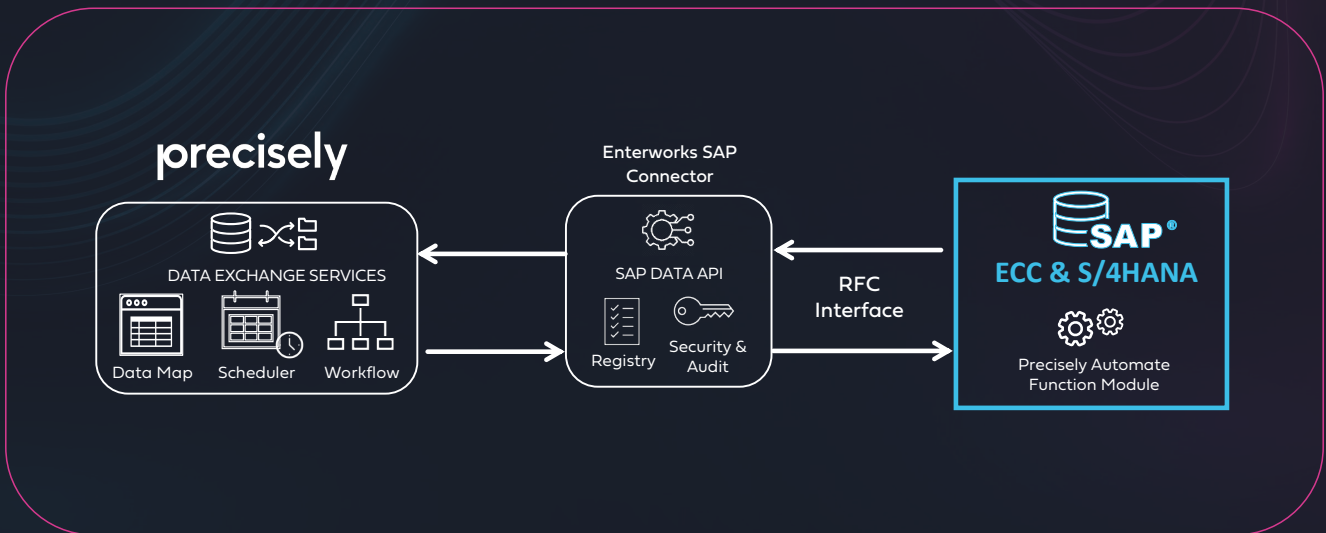

Enable timely and accurate decision making.

SAP sorted? Continue your journey to better data management with Precisely EnterWorks MDM and PIM

Precisely EnterWorks provides leading Master Data Management (MDM) and Product Information Management (PIM) solutions through EnterWorks. Alongside Precisely Automate’s SAP business process automation, no MDM or PIM has the same end-to-end workflow capability.

This system allows orchestration of your data and collaboration of content with your business, all while exchanging consistent, accurate information with customers, suppliers and marketplaces.
